

The
Global
converters' choice

APP

USE OUR PAPER, WE PLANT MORE TREES.

Introduction

APP is one of the world's largest pulp and paper companies, with vertically integrated pulp, paper and tissue production lines. APP Group is responsible for delivering quality products to meet the growing global demand for tissues, packaging and paper. On any given day, our products finds their way into the hands of consumers in various branded forms from all over the world.

The tissue division has its facilities in Java and Sumatra islands. Within the current market challenge, besides producing standard tissue products we have been evolving into specialty papers manufacturer. We are committed to create niche market by offering non-OBA and food contact compliant products with working closely with the related converters.

APP has always pursued the target of being a reliable manufacturer and partner to our customers and for the society in general. The quality of our jumbo roll tissue products, optimization of our internal processes, extreme flexibility to satisfy any possible customer demand, skilled workers and good care of the environment are the basis on which APP is built. APP is committed to responsible best practice in all of its production facilities. The majority of APP's production facilities are Chain-of-Custody certified by SVLK, LEI and PEFC. Our new Forest Conservation Policy is designed to protect natural forests from deforestation. For more information, please visit our website www.asiapulppaper.com
